

I design, build and operate AI agents and LLM-based applications for enterprise environments – from RAG pipelines and tool-calling orchestration to integration with business platforms, APIs and data, deployment and monitoring.

Software engineer and technical lead with a long track record delivering digital products for organisations such as NEOM, CaixaBank, Inditex, HP, FC Barcelona and Mobile World Capital. I work at the intersection of technology, data and business processes, turning AI into measurable value: automated analysis, reporting and decision support.
